Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/783,049	Applicant(s) PRITCHARD ET AL.	
	Examiner Cas Stulberger	Art Unit 2132	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 June 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

1. This action is responsive to communications: application, filed 02/14/2001; amendment filed 06/02/2005.
2. Claims 42-50 are pending in the case. Claims 42, 43, 47, 48, and 50 are independent claims.

Response to Amendment

3. The amendment filed 06/02/2005 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: placing the received characters in at least two data packets.

Applicant is required to cancel the new matter in the reply to this Office Action.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 42-50 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of copending Application No. 11/061,223 to Smith. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims disclose “receiving through an input device from a user, a sequence of predefined characters to be utilized to construct the password” in claim 42. This is an obvious modification of “means for receiving from a user, a plurality of predefined characters forming a user password” as disclosed in copending Application to Smith in claim 1. The instant claims also disclose “placing the received characters in at least two data packets, without regard to any timing characteristics with which the characters were received” in claim 42. This is also an obvious modification of “a network password generator comprising: packet forming means for placing each of the received characters of the user password in different ones of a plurality of data packets” as disclosed in copending Application to Smith in claim 1. As disclosed in claim 1 of the instant claims, “retrieving from a memory, a time interval mutually agreed upon by the user device and the authentication device; and individually transmitting the data packets to the authentication device separated in time by the mutually agreed upon time interval” is an obvious modification of “a memory for storing a plurality of time intervals in a predefined sequence; timing means for delaying transmission of each data packet by a time interval retrieved from the memory, wherein at a predefined frequency, a next time interval is retrieved from the predefined sequence of time intervals” as disclosed in copending Application to Smith in claim 1.
